SUMMARY

UX/UI Engineer with 4+ years of experience designing complex, professional-grade software products. Specializes in translating highly technical requirements into intuitive workflows, scalable design systems, and polished user interfaces. Experienced collaborating closely with engineering teams, with foundational knowledge of front-end technologies (React, HTML/CSS) to support efficient design-to-development handoff.

UX EXPERIENCE

Portrait Displays, Inc. - UX/UI Engineer

Jan 2024 - Present

- Own end-to-end UX and UI design for the next-generation Calman platform, focusing on usability, scalability, and workflow efficiency for professional and home enthusiast calibration users.
- Maintain and evolve a Material Design–based design system, improving consistency across products and reducing design-to-development friction.
- Partner closely with product managers and engineers to define requirements, iterate on solutions, and ship features aligned with both user needs and business goals.

Portrait Displays, Inc. — Workflow Designer

Dec 2021 - Jan 2024

- Designed and optimized calibration workflows used by major studios, professional calibrators, and hardware/display manufacturers.
- Translated complex technical and domain-specific requirements into clear, usable workflow experiences.
- Contributed to the development of Calibration-as-a-Service (CaaS), supporting automated, large-scale calibration workflows in European markets.
- Collaborated with cross-functional stakeholders to gather feedback and iteratively improve workflow accuracy and setup efficiency.

Cruz Street: Dashprophet

2021

- Designed a streamlined “read-only” viewing experience for the Dashprophet data management platform.
- Collaborated with cross-functional stakeholders to define user needs, improve information hierarchy, and ensure accessibility for non-technical business leads.
- Delivered a responsive, cloud-based solution that improved collaboration in data science workflows.

SKILLS

UX & Product Design

User Experience Design (UX) • User Interface Design (UI) • User Research & Synthesis • Information • Architecture • Design Systems & Component Libraries • Wireframing & Prototyping • Usability Testing • Accessibility & Visual Hierarchy

Technical & Collaboration

Agile & Cross-Functional Collaboration • Front-End Collaboration & Handoff • Front-End Code Literacy: React, JavaScript, HTML/CSS • Python (working knowledge)

TOOLS

Figma • Miro • GitLab • Slack • Adobe XD

EDUCATION

Springboard - UX/UI Design Course 2021

University of Washington - Bachelor of Arts 2016

ADDITIONAL WORK EXPERIENCE

Amazon - Hub Counter Plus Site Lead 2020 - 2021

Nordstrom - Sales Associate - Men’s Furnishings 2019 - 2020

Chungdahm Learning - ESL Instructor 2017 - 2018
