SUMMARY

UX/UI Engineer with 5+ years of experience designing complex, professional-grade software products. Specializes in translating highly technical requirements into intuitive workflows, scalable design systems, and polished user interfaces. Experienced in collaborating closely with engineering teams, with foundational knowledge of front-end technologies (React, HTML/CSS) to support efficient design-to-development handoff.

UX EXPERIENCE

UX/UI Engineer — Portrait Displays, Inc. Jan 2024 – Present

- Sole UX/UI designer for next-generation Calman, turning an expert-only calibration process of dozens of manual steps into a single guided, automated flow for professional and home-enthusiast users.
- Planned and ran usability testing with ~10 participants, from expert calibrators to novice home users; findings drove clearer chart labeling, plain-language explanations, and interactivity cues.
- Maintain and evolve a Material Design–based design system, improving consistency across products and reducing design-to-development friction.
- Partner with product managers and engineers to define requirements and ship features, using AI tools (Claude Code, Figma AI) to prototype and iterate faster.

Workflow Designer — Portrait Displays, Inc. Dec 2021 – Jan 2024

- Built a reusable workflow template used to create 30+ calibration workflows, cutting new-workflow build time from days to minutes; applied its patterns to 6 more custom workflows.
- Designed calibration workflows for leading display manufacturers and studios, including LG, Samsung, Sony, Panasonic, Netflix, and Disney.
- Centralized workflow logic and configuration so engineers could update calibration targets in one place instead of searching entire workflows.
- Contributed to Calibration-as-a-Service (CaaS), supporting automated, large-scale calibration workflows in European markets.

UX Designer — Cruz Street (Springboard industry project) 2021

- Designed a streamlined read-only viewing experience for Dashprophet, a data management platform.
- Defined user needs with stakeholders, improving information hierarchy and accessibility for non-technical business leads.

SKILLS

UX & Product Design

User research & usability testing • Information architecture • Interaction design • Wireframing & prototyping • Design systems • Accessibility

Technical & Collaboration

Front-end literacy (React, JavaScript, HTML/CSS) • Design-to-development handoff • AI-assisted design & prototyping • Python (working knowledge) • Agile

TOOLS

Figma • Figma AI • Claude • Claude Code • Miro • Slack

EDUCATION

Springboard — UX/UI Design Course

University of Washington — Bachelor of Arts

ADDITIONAL WORK EXPERIENCE

Amazon (Site Lead) • **Nordstrom** (Sales Associate) • **Chungdahm Learning** (ESL Instructor) 2017 – 2021
